

transaid

In sub-Saharan Africa, road deaths are the third biggest killer following HIV/AIDS and Malaria. Together with our partners we are working to make roads safer through our professional driver training (PDT) programmes.

THANK YOU.

6,786 drivers & 51 trainers

trained in Transaid-assisted training **30%↑** centres year-on-year

Supported **driver training centres** in **&** projects in

Zambia

Tanzania

Uganda

Ghana

Mozambique

41 female drivers 
trained through the **PDT-Uganda Project Phase Two**

6 new courses developed **CILT** accredited training

The **National Helmet Wearing Coalition** in **Kenya** entered into Phase Two  & continues to promote **collective action** to improve motorcycle safety

Commenced a **research project** which aims to better understand the strategies **young men** implement to **keep themselves safe** while walking to **public transport** in both **Cape Town** and **London**

Sustainable development goal 3.6: halve the number of global deaths and injuries from road traffic accidents by 2030

We believe every driver should be able to leave for a day's work without the fear they may not come home because of a lack of training, or dangerous vehicles and roads.

By sharing knowledge with our partners, we are working to ensure that every person in sub-Saharan Africa has the opportunity to build the skills they need to transform their future.
